Depending on your web browser’s cookie settings, you may need to click the “Login” button to login to the server after each time you close your browser.

In some cases, the Panopto Login process may take you to the “All Sessions” page (where all available recordings are displayed) instead of the target course folder. If this happened, click on “Folders” on the left.
A list of courses will display under “Folders”. Click on a course to view the list of recordings for the course.
